2023/10/20	Configuration
2023/12/11	Update
	Configuration
	Update
	Configuration

The recommended configuration for the PTI Scanner series is as follows

Recommended computer configuration	
CPU	Intel i7-12700H or
RAM	above 16G/32G
Hard disk	512GB SSD or above
GPU	RTX 3060 or above
Operating system	Windows10/11 64bit

1. The computer must be equipped with an independent graphics card, and it is necessary to ensure that the memory of the graphics card is more than 6GB, and our software does not support AMD graphics cards at present.
2. The CPU for Intel is recommended, but the AMD is not support.
3. We recommend using a laptop designed for gaming or using a workstation, but not a light or office laptop. Computers not powered by Windows such as Mac is not support too.
4. At the same time, Panda Smart has higher CPU requirements and we recommend using I7 12th generation or more advanced CPUs to achieve a best performance.

Minimum computer configuration	
CPU	Intel i7-11800H
RAM	16G
Hard disk	512GB
GPU	RTX 2060
Operating system	Windows10/11 64bit

Here are some computers we recommend

Item		PANDA smart	PANDA P2/P3
Dell Alienware X16 CPU i9-13900HX GPU RTX 4060 RAM 32GB RAM DISK 512GB SSD		✓	✓
Dell G15-5530 CPU i7-13650HX GPU RTX 4060 RAM 16GB DISK 512GB SSD		✓	✓
Lenovo IdeaPad 3i CPU i7-12650H GPU RTX 3060 RAM 16GB DISK 512GB SSD		✓	✓
MSI GL76 CPU i7-12650H GPU RTX 3060 RAM 16GB DISK 512GB SSD		✓	✓
Dell G15 5520 CPU i7-12700H GPU RTX 3060 RAM 16GB DISK 512GB SSD		✓	✓
